***Response to Amendment***

1. The amendment filed 22 October 2008 will not be entered because it raises new issues requiring further consideration and search, namely the new limitations added in claims 1 and 4. Additionally the amendment raises new issues that would require further consideration under 35 U.S.C. § 112, first paragraph for the recitation of "pressurized" closed space given that while there is support in the specification for internally pressurizing the space, the specification also states that there is no pressure applied from the outside. Therefore, there is no support for the broad recitation of pressurized closed chamber which includes pressurizing by both internal and external means.
